THE HOME OF ARCHIAS' SURE SEEDS

FOUNDED 1884

INCORPORATED 1905

SEDALIA, MO., JANUARY 1, 1911.

DEAR READER—We herewith hand you our **Twenty-eighth Garden Annual**, enlarged and improved, full of good things for the Farmer, Gardener, Florist and Stockman. We are not the oldest Seed House in business and we are sometimes glad of it. Many a mercantile house, proud of being the oldest, has awakened to the fact that a newer firm has suddenly forged to the front with new ideas, original methods and up-to-date goods. Unable to "rest on the oars" of an old reputation, the younger firm has been obliged to pull steadily up stream, supplying the latest and best, the newest and most novel. History repeats itself in the Seed business, as in every field.

Advance

There is probably no house today that has shown such a great improvement over all previous efforts, as has the Archias Seed Store Corporation. We have put forth our greatest efforts and have spared neither time, money or energy to produce the finest strains of Seeds and Plants and the most approved and up-to-date supplies manufactured. That our patrons will appreciate this special effort by awarding us their custom we feel assured, and in turn, assure them the most careful attention to the execution of their orders.

Improvement

Better Quality, Better Treatment, Better Service, Promptness, Accuracy and Better knowledge of the Seed business. These are the secrets of our success. We are always on the alert for **IMPROVED SEEDS, PLANTS AND BULBS** that will give satisfaction and pay our customers to grow. Our Mr. L. H. Archias spent nearly three months of last year in Europe among the most noted growers of Seeds, Plants and Bulbs studying the crops. We also have the very best growers in America from whom we draw our supplies. Our customers are assured of the Best that can be produced at moderate prices.

Our Location

Sedalia, the home of "Sure Seeds," is located near the center of the best and richest agricultural state in the Union. We have soils capable of producing the finest seeds of many varieties suited to our climate with good shipping facilities, low freight and express rates. We have railroads running in six directions from Sedalia and over thirty mails daily.

Our Greenhouses and Nursery

We own, at Sedalia, the largest and best equipped system of up-to-date greenhouses in Central Missouri, where our customers are supplied with the very finest plants, cut flowers, floral designs, and nursery stock—fresh and in fine condition. We have also added a Conservatory to our Seed building that will pay you to visit if you are in Sedalia.

Our Catalogues Are Free

Tell your neighbor about the Archias' Plan, and have them send for our catalogue; thus you do a two-fold favor, which we assure you is appreciated, as many hundreds of new customers are added each year by the recommendation of our old friends.

Heartily wishing one and all a **HAPPY AND PROSPEROUS NEW YEAR**, we remain,

Most sincerely yours,

L. H. ARCHIAS, President.
L. A. KIPPING, Vice President.
L. ARCHIAS, Secretary.

Archias' Seed Store Corporation.

Archias' Select Northern Grown Garden Peas

Our Peas are Northern grown. They are the earliest, hardiest and most productive. For years we have made a specialty of Peas. Much skill is required to properly grow Seed Peas, and we employ experts to handle our crops. Our stocks are bright, handsome, sound as a dollar and of perfect growth.

Sow Peas in drills about 4 inches deep. The drills must not be nearer than 2 feet, except for the lowest sorts. Those growing 3 feet high or more should not be nearer than 3 or 4 feet, and should have brush for their support. Avoid fresh manure and very rich soil, as they cause the vines to grow too rank. One pint will sow 40 feet of drill; 2 bushels for an acre, in drills 3 feet apart.

WHY WE GROW

Sedalia, the Home of Sure Seeds, is situated in the heart of the best Agricultural State in the Union. Archias' Sure Seeds are grown by Specialists and are dependable. They are annually planted in all parts of the United States by the best Market Gardeners and amateurs. They give satisfaction. We have the largest Seed establishment in Missouri, and we are growing.

RADISHES

To produce these small extra early Radishes with crisp, tender flesh, they must be grown quickly in rich, loose soil, and gathered before reaching full size to prevent becoming soft and pithy. Frequent plantings should be making for succession, to insure a supply of fresh, tender Radishes for table use at all times.

OUR RADISH SEED is strictly of the finest grade, being grown from carefully selected and transplanted roots. It is far superior to the commercial seed produced cheaply from roots that are never transplanted.

HOW TO MAKE A HOT BED

Select a well drained spot and make the pile of manure 15 to 18 inches deep; or a foot of soil may be dug out and filled in with manure, well tramped down. Place the frame on it. Then put 4 inches of good soil over the surface. Throw some manure

for Hot-beds and Cold-frames

or soil up against the outer boards to hold the heat. Put on the sash and keep tight for three or four days. Keep a thermometer in the bed, and when the temperature falls to 75 degrees, seed may be sown with safety. The temperature in a hotbed should not be allowed to go above 70 degrees in the day nor below 50 at night. With a hotbed the amateur can start almost any kind of vegetable or flower seed. By sowing such vegetables as Egg Plant, Pepper, Tomatoes, etc., and such flowers as Heliotrope, Scarlet Sage, Vinca, Verbeena, etc., along in March, it is possible to have nice stocky plants ready to set out as soon as the weather conditions are favorable, insuring early returns from the vegetables and a long season from the flowers.

SUNLIGHT DOUBLE GLASS SASH

Write for circulars and prices on Hot Bed Sash. We are agents for the celebrated "Sunlight" Double Glass Sash for Hot Beds and Cold Frames. Made with a double layer of glass enclosing 5-8-inch air space between the two layers. Lets in the light always. Never has to be covered or uncovered; no boards or mats needed. Retains the heat; excludes the cold; glass slips in; no putty; can not work loose; easily repaired.

No good gardener can afford to waste time and labor on the old single layer sash that must be covered and uncovered daily, and they fall far short of the Sunlight Double-Glass Sash in results.

Farmers, suburbanists, city folks, with little yard-gardens, will also find the Sunlight Sash ideal for profit or for pleasure.

Tobacco growers once supplied with Sunlight Double-Glass Sash will year after year have far the best and earliest plants. Plant beds in the woods are out of date now.

ARCHIAS' SPECIAL REID'S YELLOW DENT

This is the highest type of this most popular and wonderful variety.

Reid's yellow Dent has won more prizes at the many corn shows and fairs than all others combined. The small cob is completely covered from butt to tip with solid corn, moderately rough kernels evenly set. A valuable variety for stock feeders. It is of handsome shape and color and largely grown for exhibiting at fairs, corn shows and is used in many corn schools as a standard for judging. Our Reid's Yellow Dent was grown from prize winning stock, and no better can be found. If you wish to win prizes at the fairs do not fail to plant our strain of Reid's Yellow Dent.

Improved Leaming

A quick growing yellow variety, highly esteemed by those who have grown it. It usually produces two ears to the stalk. It is one of the seven varieties recognized by the Illinois Experiment Station, where it has been first in yield more times than any other variety. The Improved Leaming has been selected for a richer color—a beautiful brownish yellow—a deeper and somewhat rougher kernel. The ears average about 10 inches long and weigh ¾ to 1 lb. each. The stalks are of medium height with many broad leaves, making it one of the best sorts for ensilage and fodder. Numerous tests at the Experiment Station show it high in protein and oil content, making it valuable to the live stock grower and feeder. By mail postpaid, lb., 25c; 3 lbs., 60c. By freight or express, qt., 15c; pk. 75c; ½ bu. \$1.25; 1 bu. \$2.25; 2 bu. \$4.00; 5 bu. \$9.00. Sacked free.

Golden Cartner Corn

A popular variety among the corn growers of the Missouri valley. The ear is short and thick, grain deep with small red cob, easily shelled, and withal an excellent cattle Corn, as the cob is not hard. Very prolific. Our growers won first prize at Missouri State Corn Show, Columbia, Mo., last season in "shelling contest." Our stock is pure and can be depended on. Price by mail, 1 lb., 30c; 3 lbs. 75c. By freight or express, pk., 65c; ½ bu., \$1.25; 1 bu., \$2.25; 2 bu., \$4.25; 5 bu., \$10.00. Sacked free.

Has made friends rapidly where known. The stalks grow 8 to 10 feet high, full dark foliage, setting its ears low, usually maturing two good, sound ears 8 to 12 inches long. In a test 70 pounds of ears shelled 64 pounds of corn; matures in 90 to 100 days. By mail, postpaid, 1 lb., 25c. My Archias Golden Mortgage Lifter made fine corn. I think it the best corn in the country.

CHARLIE TROTTER.
Clime, Texas.

I have grown Archias Golden Mortgage Lifter Corn for several years. It simply outyields any other corn and the quality is superior. It will outshell any corn in existence.

ROY BROWSING.

Pittsville, Mo.

On June 1st I planted Archias Golden Mortgage Lifter Corn. We had bad wet weather, followed by a severe drouth when the corn needed rain. It stood the wet and dry weather better than any corn I ever raised. Ears are good size, good length and well filled rows straight from butt to tip. Grains are close, deep and narrow. Very desirable for feeding.

FRANK A. SIMMONS.

Archias' Golden Mortgage-Lifter Corn

Won more first premiums in 1910 than ever before. It is fast coming to the front as the most popular and most profitable corn to grow.

We have enough good testimonials to fill a book if we had room for them.

Lawrenceburg, Tenn.

I am well pleased with Archias Golden Mortgage Lifter Corn. I grew a fine lot this season, ears measuring over ten inches—the largest grain and smallest cob. I shall continue to raise Mortgage Lifter.

LE ROY HAGER.

Chambersburg, Pa.

I grew a field of Archias Golden Mortgage Lifter corn nine years ago and have never seen anything to equal it since. Will plant your Mortgage Lifter this year.

WILLIAM C. HUNTER.

Southwest City, Mo.

Archias Golden Mortgage Lifter outgrew all other corn on our farm, and such large ears. I can not praise it too highly.

MRS. I. R. COX.

Farmington, Ark.

Archias Golden Mortgage Lifter corn won first premium at the Washington County Fair. It matured in ninety-five days and yielded one hundred and seventeen bushels per acre. It is easily husked and on account of small cob does not mould in the shock like large cob varieties.

M. J. KILCREUSE.

South Paris, Maine.

I enclose a photograph of Archias Mortgage Lifter Corn growing in Maine. It attracted much attention at our Fair as the largest corn ever seen in this section. I am well pleased with it and if there is any lack of words to express my satisfaction, you can find them in my picture as I am standing in front of the corn.

The cob is so small and the grain so large and broad that a single grain will almost cover the end of the cob when broken in half. It is of a beautiful golden yellow color and of fine quality for grinding. It matures in about 110 days and yields big crops. We recommend the Golden Beauty as the handsomest and largest grained Corn in cultivation, and is sure to please every farmer who grows it. By mail, per lb., 25c; 3 lbs., 60c. Archias' Speckled Beauty Corn

Introduced by us in 1892, and the past season has made a wonderful record. It is an improved strain of the old strawberry. If you are a feeder you will do well to get a start in this great yielding, great feeding Corn. It holds a warm place in the hearts of Corn producers. Ears are from 10 to 12 inches long, deep grain, medium cob, medium rough, two good ears to the stalk. Many ears weighing over a pound and no small ears. Yields 125 bushels to the acre. Rich in oil and protein, easily masticated by cattle, roots large, stalks strong and thrifty. Try it, you can't afford to be without some of this variety if you are a feeder. It makes heavy yields and is strong in germination. You should include some of this in an early order. The best corn for bottom land, but will produce mammoth crops in any good corn land. WHITE VARIETIES BOONE COUNTY WHITE

A pure bred white Corn of very large size and high fattening and milling qualities. It is rather a late variety, maturing in from 115 to 120 days, and can not be recommended for planting north of Missouri and Kansas. Years of scientific breeding and patient selection have developed this variety into the largest yielding white Corn known.

A very large, fat, heavy ear, tapering only slightly from butt to tip, rounding off nicely within an inch of the top; 18 to 24 rows of about 50 kernels each, carried out to the full length of the ear.

Tips and butts that are exceptionally well filled out; the entire surface of the cob is completely covered with a solid layer of grains one-half to three-fourths of an inch deep.

Archias' Hardy Perennial Plants

Hardy perennials are the most popular of all plants and should be in every garden. We have made special efforts to procure for our customers all that is best in this interesting class of plants. Hardy plants—the kind that stay out all winter and come up again the following spring. The love for Hardy Perennial Flowers has of late years increased in a very great degree, and we cannot recommend them too highly to our customers for subjects to plant in Borders, Shrubbery, Naturalizing, Wild Garden and Rock Garden, along carriage drives, around lakes and ponds, and, last but not least, for their value as cut flowers, as they supply the table from early spring to fall. They remind us of our childhood days, when we used to roam around in grandmother's garden; they also appeal to us as old companions, who please us by their faithfulness and bring back to memory scenes and happenings of days gone by.
